

6-core fiber optic patch panel specifications

Overview

Constructed from 16 gauge steel for performance and durability. Includes locking dual-hinge to protect contents. Holds 6 LGX adapter panels up to 144 fibers (144 LC, 72 SC or ST). Fiber patch panel is widely used in local telephone, agricultural network system, data, image transmission system and CATV cable TV series. It is used for direct connection and branch connection of indoor optical fiber, and plays the role of storage of tail fiber disk and protection of joint. Raised slots in the panel base allow for customized. The Siemon LightVerse® system includes a range of Fiber Modular Patch Panels, designed to provide users with a flexible solution for deploying fiber optic connectivity in high-density data center and intelligent building environments where fast deployment and simple maintenance is required. The small footprint and DIN Rail mounting features of the ILIUD allow it to be mounted in the same enclosure as. Fibertronics, Inc.
