

Adhesive strips on the back of the distribution box

Article Overview

Adhesive strips on the back of a distribution box are used to mount the box securely to a wall or surface without screws, providing a quick and damage-free installation.

Purpose of Adhesive Strips

Adhesive strips on distribution boxes serve as a screwless mounting solution, allowing the box to be attached to walls or panels easily. They are designed to hold the box in place while keeping the installation neat and avoiding drilling into surfaces, which is especially useful for decorative or lightweight electrical panels .

Installation Guidelines

- **Surface Preparation:** Clean the wall or mounting surface thoroughly to remove dust, grease, or moisture. Adhesion is strongest on smooth, dry surfaces .
- **Marking Position:** Measure and mark the exact location where the distribution box will be mounted to ensure proper alignment .
- **Applying the Strips:** Peel off the protective backing from the adhesive strips and press the box firmly against the wall. Hold for 30 seconds to ensure a strong bond .
- **Curing Time:** Avoid placing heavy plugs or equipment in the box for a few hours to allow the adhesive to set fully .

Considerations and Limitations

- **Weight Limit:** Adhesive strips are generally suitable for lightweight boxes. Heavier...
