

Argentina Indoor Electrical Distribution Box Processing Plant

Article Overview

ABB's Bella Vista plant in Tucumán is a leading facility for manufacturing low-voltage electrical distribution equipment in Argentina.

Key Manufacturing Facility

The ABB Bella Vista plant, located in Tucumán province, is a major processing and manufacturing site for indoor electrical distribution equipment in Argentina. Operating for over 50 years, the plant engineers and produces Miniature Circuit Breakers (MCBs), Residual Current Devices (RCDs), contactors, and capacitors for low-voltage applications across Latin America, ensuring safe and efficient electrical distribution. The facility employs more than 150 people and serves as a regional benchmark for high-performance, low-carbon manufacturing. The plant has achieved Mission to Zero™ sustainability milestones, reducing operational greenhouse gas emissions by 97% compared to 2019 levels, primarily through renewable electricity use, on-site solar generation, and energy-efficient equipment. It operates entirely on renewable electricity, with 15% generated on-site and 85% sourced from I-REC certified renewable energy from the grid. The facility also maintains ISO 50001, ISO 9001, ISO 14001, and ISO 45001 certifications, embedding energy management, quality, environmental, and safety standards into daily operations.
