

Brazilian Antioxidant Cable Tray Prices

Article Overview

In Brazil, antioxidant (corrosion-resistant) cable trays typically range from \$5 to \$25 per meter, depending on material, type, and coating.

Price Overview

Antioxidant cable trays in Brazil are generally made from stainless steel, galvanized steel, or aluminum, with coatings such as hot-dip galvanization (HDG) or powder coating to enhance corrosion resistance . Prices vary based on:

- **Material:** Stainless steel is the most expensive due to superior corrosion resistance, while aluminum is lighter but pricier than standard steel. Galvanized steel offers a balance of durability and cost .
- **Tray Type:** Ladder trays are stronger and cost more, wire mesh or perforated trays are cheaper and suitable for lighter loads .
- **Size and Thickness:** Wider or thicker trays designed for heavy-duty applications increase material costs .
- **Surface Treatment:** HDG or powder-coated trays add to the price but improve longevity in harsh environments .
- **Order Quantity:** Bulk purchases can reduce costs by 20–40% .
- **Installation and Shipping:** Labor, accessibility, and transport costs can significantly affect the final price .

Typical Price Range

- Wire mesh trays: \$5–\$10 per meter...
