

Cable tray price 15050

Article Overview

A 150×50 mm cable tray typically ranges in price depending on material, type, and supplier, with galvanized steel trays like CT15050 commonly used for medium-duty applications.

Product Overview

The 150×50 mm cable tray is a standard size suitable for managing medium-sized cables in commercial, industrial, and residential installations . Common types include:

- Ladder Cable Tray: Two side rails with rungs, ideal for heavy or medium cables, offering excellent ventilation and heat dissipation .
- Perforated Cable Tray: Flat or slightly laddered bottom with holes or slots, providing airflow and flexibility for cable mounting .
- Solid Bottom Cable Tray: Fully enclosed, protecting cables from dust, debris, and environmental hazards, suitable for sensitive or low-heat cables .

Material and Dimensions

- Material: Galvanized steel is common for durability and load-bearing capacity; aluminum and PVC options exist but vary in strength .
- Dimensions: Standard length is 2400 mm, width 150 mm, and height 50 mm (CT15050 model) with a thickness of 1.5 mm . Other lengths and widths are available depending on project requirements.
- Load Capacity: Ladder trays support heavier cables, while perforated and solid trays are suitable for medium or light loads
