

Explosion-proof distribution box frequency converter control

Article Overview

An explosion-proof distribution box with frequency converter control safely regulates motor speed in hazardous areas while meeting ATEX, IECEx, and GB standards.

Overview

An explosion-proof distribution box with a built-in frequency converter is designed to control the speed of three-phase asynchronous motors in hazardous environments, such as chemical plants, oil refineries, mines, and grain handling facilities. These systems adjust motor output frequency to meet production requirements, achieve energy savings of 30–60%, and can function as motor starters or closed-loop speed control systems using sensors and transmitters ().

Key Features

- **Hazardous Area Certification:** Suitable for Zone 1 and Zone 2, gas groups IIA and IIB, with temperature classes T1–T4. Explosion-proof marks include Ex dII C T4 and Ex dII B T6 ().
- **Construction:** Cabinets are made from aluminum alloy or steel plate with surface spraying, providing IP54–IP65 protection against dust and water ingress ().
- **Components:** Equipped with frequency converters, circuit breakers, signal lights, and other control elements from reputable manufacturers like Fuji or Schneider ().
- **Control Capabilities:** Supports fault display, constant power factor operation, and integration with closed-loop control systems for precise motor speed regulation ()....
