

Features of Dominican Fiberglass Cable Trays

Overview

Our fiberglass cable tray gives you the load capacity of steel plus the inherent characteristics afforded by our Protrusion Technology: non-conductive, non-magnetic, and corrosion-resistant. Although light in weight, their strength-to-weight ratio surpasses that of equivalent steel. more than just physical support systems for your cables. They promote air circulation, preve suring seamless installation and reliable cable support. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. We also. Fiberglass Cable Tray, also known as GRP (Glass Reinforced Plastic) cable tray, is a non-metallic support system used to route and protect electrical cables in highly corrosive, humid, or outdoor environments.
