

Fiber Optic Cable Endoscopy

Overview

Functionality: Fiber optic cables transmit high-intensity light from the light source to endoscopes, providing bright, uniform illumination of the operative field. **Use Cases:** Essential for hysteroscopy, laparoscopy. Sunoptic Surgical manufactures high-performance endoscopic cables engineered for exceptional light output, long-term durability, and precise illumination in every procedure. They are precisely manufactured in-house with medical grade materials and a quality management system that complies with FDA regulations, and ISO 13485 certification. Medical grade silicone and stainless steel are used during manufacturing. There are endoscope camera cables for.
