

Fiber Optic Splitter Price Inquiry

Article Overview

Fiber optic splitters typically range from \$5 to \$50 for standard PLC or FBT splitters, depending on split ratio, type, and packaging.

Overview of Pricing

The cost of a fiber optic splitter depends on several factors, including the splitter technology (PLC vs FBT), split ratio, connector type, and whether it is bare, cassette, or rack-mounted. Basic small splitters like 1x2 or 1x4 FBT splitters are generally the most affordable, often starting around \$5-\$10 per unit. Larger splitters, such as 1x16, 1x32, or 1x64 PLC splitters, are more complex and can cost \$20-\$50 or more, especially when pre-installed in ABS boxes, LGX cassettes, or rack-mount enclosures .

Factors Affecting Cost

- **Splitter Type:** PLC splitters are more precise and suitable for high split counts, making them slightly more expensive than FBT splitters, which are cost-effective for smaller splits .
- **Split Ratio:** Higher split ratios (e.g., 1x32, 1x64) require more sophisticated fabrication, increasing the price .
- **Connector Options:** Splitters with pre-installed connectors (LC, SC, FC, APC/UPC) are more expensive than bare fiber versions .
- **Form Factor:** Rack-mounted or cassette-style splitters provide plug-and-play convenience but add to the cost compared to bare or blockless splitters .
- **Quantity and Supplier:** Wholesale or factory pricing can reduce per-unit cost, while retail platforms like eBay may have higher prices due to shipping and handling
