

How long does it take to re-lay the fiber optic cable

Overview

Common issues can typically be resolved in a timeframe of 2 to 4 hours once on-site, depending on the complication involved and the technician's expertise. How long does the setup take?

Most residential jobs finish within a few hours. Larger business projects might span several weeks. We want to clear up the confusion around these schedules. Every building has unique needs. Some homes have existing conduits ready for use, while other properties. The time it takes to complete a fibre installation can vary significantly depending on several factors, including: The farther your premises are from the fibre node, the longer the installation will take. This is because the fibre cable needs to be laid over a longer distance, which can be. Most projects take longer to plan than to install. Small offices may wrap up in days. Comprehensive repair guides detail professional protocols that align with industry best practices, emphasizing. Our technicians will begin laying the fiber optic cable once the site survey and prep work are complete.
