

How much does domestically produced fiber optic cable for smart buildings cost in the EU

Article Overview

In the EU, domestically produced fiber optic cables for smart buildings typically cost between €0.05 and €1.50 per meter, depending on type, fiber count, and environmental rating.

Price Ranges and Factors

- Indoor simplex/duplex cables: €0.05–€0.30 per meter, suitable for standard office or residential smart building installations .
- Single-mode outdoor cables: €0.10–€0.50 per meter, used for longer runs or external connections .
- Multimode cables (OM1/OM2/OM3): €0.10–€0.60 per meter, often used for high-speed internal networks .
- Armored cables: €0.30–€1.00 per meter, providing protection in harsh environments or direct burial applications .
- Aerial/self-supporting cables: €0.40–€1.50 per meter, for rooftop or external installations . The fiber count significantly affects cost: a 2-core cable is much cheaper than a 24-core or 96-core cable. Cable construction (loose tube, tight-buffered, armored) and jacket material (PVC, LSZH, PE) also influence pricing. Custom or pre-terminated cables for smart building automation can increase costs further.
