

How much does it cost to customize a trough-type cable tray

Article Overview

The cost to construct a trough-type cable tray typically ranges from \$5 to \$50 per meter, depending on material, size, and installation complexity.

Material Costs

The material of the cable tray is a primary cost driver:

- Steel trays: \$5–\$25 per meter, durable and suitable for general indoor installations .
- Aluminum trays: \$6–\$30 per meter, lightweight and corrosion-resistant, ideal for outdoor or humid environments .
- Fiberglass (FRP) trays: \$10–\$50 per meter, highly resistant to aggressive environments, often used in chemical plants or coastal areas .
- Stainless steel trays: Highest cost, used in hygienic or extreme conditions like food processing or offshore facilities . Trough-type trays, being solid-bottom designs, may cost slightly more than open ladder trays due to additional material and fabrication requirements .

Installation Costs

Installation adds significantly to the total cost:

- Labor: Skilled workers are required, and costs increase with tray height, routing complexity, and project environment
