

How much does it cost to test fiber optic cables

Article Overview

Fiber optic cable testing typically costs between \$90 and \$180 per hour for qualified technicians, with total project costs ranging from \$1,300 to \$11,000 depending on complexity and scope.

Cost Overview

Testing fiber optic cables involves verifying continuity, insertion loss, polarity, and splice quality using specialized equipment such as OTDRs, light sources, and power meters . The hourly rate for a qualified fiber technician generally ranges from \$85 to \$180, depending on region, certifications, and service urgency . A single fault or splice may require 3-12 hours of labor, while more complex projects with multiple splices or high-availability requirements can take 12-20 hours or more .

Typical Project Costs

- Standard repair and testing: \$1,300-\$6,000 for straightforward faults with minimal splices and accessible cable runs .
- Complex repairs or long runs: \$6,000-\$11,000, including multiple splices, specialized testing, and challenging access conditions .
- Per-splice pricing: \$200-\$600 depending on equipment and skill required .

Factors Affecting Cost

- Cable type: Single-mode fiber is generally less expensive per foot than multimode...
