

How much does steel wire optical cable cost

Article Overview

The price of all-steel wire optical cable varies widely depending on steel grade, strand construction, coating, and supplier, typically ranging from \$1.50 to \$5.00 per meter for standard industrial grades.

Factors Affecting Price

- **Steel Grade and Carbon Content:** Low, medium, and high carbon steel wires differ in strength and flexibility. High-carbon steel wires are more expensive due to their superior tensile strength and durability .
- **Strand Construction:** Common constructions like 1x7 (seven-wire strands) balance flexibility and strength. Larger diameters or multi-strand composites increase cost .
- **Corrosion Protection:** Galvanized, phosphated, or alloy-coated wires (e.g., zinc-nickel or brass) are priced higher due to enhanced durability in aerial or duct applications .
- **Regional Supply and Manufacturing:** China dominates production, offering cost-effective solutions, while local suppliers may charge more due to shipping and import costs .
- **Volume and Customization:** Bulk orders reduce per-unit cost, while custom diameters, coatings, or hybrid strands (e.g., aramid-reinforced) increase price .

Typical Price Ranges

- Standard low to medium carbon steel wire: \$1.50-\$3.00 per meter
- High-carbon or corrosion-resistant coated wire: \$3.00-\$5.00 per meter...
