

How to attach the optical distribution box

Article Overview

Connecting an optical distribution box involves mounting the box, introducing fiber cables, splicing fibers, and managing connections to ensure reliable signal transmission.

Step 1: Mounting the Distribution Box

- Select the location: Choose a stable, accessible location, either indoors or outdoors, depending on the box type. Outdoor boxes should be weatherproof and UV-resistant .
- Mounting method: Use wall anchors, lag bolts, or pole bands to secure the box. Ensure it is level using a bubble level and stable under moderate lateral pressure .
- Height: Mount the box at a convenient height (typically 3-5 feet above ground) for easy access .

Step 2: Introducing Fiber Cables

- Cable entry: Feed the optical cable through the designated inlet hole. Use grommets or cable entry devices to secure the cable and prevent movement .
- Bending radius: Maintain the minimum bending radius to avoid signal loss or fiber damage .
- Fixing the cable: Use cable clamps or fixing devices to hold the cable firmly in place .

Step 3: Splicing and Connecting Fibers

- Prepare fibers: Strip the outer jacket and protective layers carefully, exposing the...
