

How to connect to Wi-Fi after switching to a fiber optic router

Article Overview

To enable Wi-Fi on a fiber optic router, connect it to the ONT, access the router's admin panel via a browser, and configure the wireless network settings including SSID and password.

Step 1: Connect Your Router to the Fiber Network

- Ensure your Optical Network Terminal (ONT) is installed and powered on. This device converts the fiber optic signal into Ethernet for your router .
- Use an Ethernet cable to connect the ONT's LAN port to the WAN port on your router .
- Power on your router and wait for the indicator lights to stabilize, confirming a successful connection .

Step 2: Access the Router's Admin Panel

- Open a web browser on a device connected to the router via Ethernet or existing Wi-Fi.
- Enter the router's IP address (commonly 192.168.1.1 or 192.168.0.1) in the address bar .
- Log in using the default username and password provided in the router manual or on the device label. If you have changed credentials previously, use those.

Step 3: Configure Wi-Fi Settings...
