

How to install a network cabinet with a filter

Article Overview

To install filters on a network cabinet, follow these steps:

- **Ensure Proper Grounding:** Make sure the filter housing is bonded to the host cabinet via a metal-metal connection. All surfaces should be conductive and free of paint or insulating materials .
- **Mounting Options:** Use easy-to-install mounting options such as magnetic mount strips or Z brackets to keep multiple intake filters side-by-side .
- **Placement:** Position the filters on the outside of the intake to effectively manage airflow and protect the equipment from dust and debris .

By following these guidelines, you can ensure effective installation and operation of filters in your network cabinet.
