

Ivory Coast Rack-Mounted PDU Waterproof Type

Article Overview

For humid or wet environments like Ivory Coast, choose industrial-grade or IP-rated rack-mounted PDUs designed for water resistance and reliable power distribution.

Key Considerations for Waterproof Rack PDUs

1. IP Rating and Environmental Protection

- Look for PDUs with IP44 or higher ratings to ensure protection against splashing water and dust. Industrial PDUs often provide enhanced sealing and corrosion-resistant enclosures suitable for tropical climates .
- Ensure the PDU can operate in high humidity and elevated temperatures, common in Ivory Coast, without performance degradation .

2. PDU Type and Functionality

- Basic PDUs: Simple power distribution with fixed outlets, suitable for small racks or non-critical applications .
- Metered PDUs: Monitor voltage, current, and power consumption at the rack level, helping prevent overloads .
- Managed/Switched PDUs: Allow remote control of individual outlets, group reboot, and integration with network monitoring systems, ideal for critical IT infrastructure .

3. Input and Output Options...
