

Model of tri-proof lighting distribution box

Article Overview

Tri-proof lighting distribution boxes are available in IP65-rated modular designs, including AT and HT series, suitable for industrial and outdoor environments.

Overview of Tri-Proof Distribution Boxes

Tri-proof lighting distribution boxes are designed to protect electrical connections and lighting circuits in environments exposed to dust, moisture, and mechanical impact. They are commonly used in industrial halls, underground garages, storage rooms, and outdoor installations. Key features include IP65–IP68 protection, robust ABS or polycarbonate housings, and compatibility with DIN rail-mounted components for flexible wiring and maintenance .

Popular Models and Series

- AT Series
 - Compact and value-focused, ideal for tight spaces and straightforward cabling.
 - Provides reliable IP65 sealing for outdoor and industrial use.
 - Suitable for small-scale tri-proof lighting installations .
- HT Series
 - Offers more internal space for additional terminals or DIN rail configurations.
 - Designed for installations requiring cleaner wiring and future upgrades.
 - Supports modular LED tri-proof luminaires and optional sensor or DALI integration
