

National Standard for Box-Type Connectors

Overview

NEC Article 314 is the main section for outlet boxes, device boxes, conduit bodies, junction boxes, pull boxes, and related fittings. IEC 60320, entitled "Appliance couplers for household and similar general purposes", is a set of standards published by the International Electrotechnical Commission (IEC) that defines non-locking appliance couplers for connecting power supply cords to electrical appliances. A conduit body is a removable-cover section of a conduit system that provides access at junctions or termination points. The challenge intensifies when combining connectors and enclosures—individually certified components can create uncertified systems if not properly matched. This guide. Conduit fittings connect conduit to other conduit or to an electrical box. What NEC Rules Apply to Junction Boxes?

NEC 314.

Article Content

Connectors

American National Standard for Electric Connectors—Insulation-Piercing Connector Systems, Rated 600 V or Less (Low Voltage

European standards for plugs and sockets

It guarantees a high safety standard for power distributors (i.e. our receptacle combinations), switchgears

NEMA Standards

NEMA Standards Unifying the Electroindustry Setting and Raising the Industry's Standards For 100 years,

Conduit Fittings

Conduit fittings connect conduit to other conduit or to an electrical box. They are available in various metals and with different levels

IEC 60320

The dimensions and tolerances for connectors, appliance inlets, appliance outlets and plug connectors are given in standard sheets,

Power Cord Types and Standards Explained

This article defines the role of power cords and explains how power cord types are classified by regional standards,

Perplexity

Perplexity is a free AI-powered answer engine that provides accurate, trusted, and real-time answers to any question.

Junction Box

This standard is applied the performance test of smart junction box for newly-developed vehicles or already produced

Best Electrical Panel Connectors for Safe Setup 2026

Master NEC 2026 compliance with the right electrical panel connectors. Our guide compares electrical box connector

A Complete Guide to NEC Article 314 on Electrical Boxes and Conduit

NEC Article 314 establishes requirements for the installation and use of electrical boxes, conduit bodies, fittings, and

Electrical Junction Box

This standard shall be applied to the performance test of stamped metal routed wire type junction box of

NEMA Standards Publication FB 1-2014

Foreword This Standards Publication provides practical information concerning construction, test, performance, and

CSA C22.2 NO. 65:25 Wire connectors (Trinational standard with

CSA C22.2 NO. 65:25 Wire connectors (Trinational standard with NMX-J-543-ANCE-2025 and UL 486A-486B) Preface This is the
