

Price of Angle Iron Supported Cable Trays

Article Overview

Angle iron supported cable trays generally range from \$15 to \$50 per foot, depending on material, size, and finish.

Overview

Angle iron supported cable trays are widely used in industrial, commercial, and data center applications to provide strong, durable support for electrical and communication cables. They are typically made from galvanized steel, stainless steel, or electro-galvanized steel, offering corrosion resistance and long-term reliability . The trays can support heavy cable loads and are often used with accessories like dividers, covers, and grounding kits to ensure safety and organization .

Factors Affecting Price

- **Material:** Galvanized steel is the most common and cost-effective, while stainless steel (304 or 316) is more expensive due to higher corrosion resistance .
- **Size and Load Capacity:** Wider trays or those designed to carry heavier loads cost more. Standard widths range from 4 to 24 inches, and load ratings can reach up to 280 lbs per foot with proper supports .
- **Finish:** Hot-dip galvanizing or electro-galvanizing increases durability but also increases cost .
- **Supplier and Quantity:** Bulk orders or direct manufacturer purchases (FOB, CIF, EXW) can reduce per-foot costs, while small orders from distributors may be higher .
