

Price of Flange-Type Fiber Optic Couplers

Article Overview

Flange-type fiber optic couplers typically range from \$20 to \$150 per unit, depending on type, fiber count, and manufacturer.

Overview

Flange-type fiber optic couplers are designed for permanent panel or enclosure installations, providing secure mounting and precise alignment for optical signals. They are commonly used with MPO/MTP connectors in multi-fiber configurations, as well as singlemode and multimode fibers for high-speed data transmission. The flange ensures mechanical stability and reduces signal loss, making these couplers suitable for data centers, industrial networks, and high-performance optical systems.

Price Factors

- **Connector Type and Fiber Count:** MPO/MTP couplers with multiple fibers generally cost more than simplex or duplex couplers due to higher complexity and precision.
- **Material and Build Quality:** High-quality couplers with ceramic sleeves, dust caps, and robust flanges command higher prices, often in the \$50-\$150 range.
- **Brand and Supplier:** Established brands like L-com, Panduit, and Phoenix Contact may be priced higher than generic or in-house brands like RS PRO.
- **Special Features:** Angle-polished, hybrid, or DWDM-compatible couplers designed for low-loss or high-precision applications can increase the cost.

Typical Price Range

- **Simplex or Duplex Flange Couplers:** \$20-\$50 per unit...
