

# Price of Mesh Splicing Cable Trays

## Article Overview

Spliced wire mesh cable trays typically range from \$20 to \$150 per section, depending on material, size, and supplier.

### Pricing Overview

The cost of spliced wire mesh cable trays depends on several factors:

- **Material:** Steel trays are generally the most common and durable, priced moderately; aluminum trays are lighter and corrosion-resistant, often slightly higher; fiberglass trays are non-conductive and may cost more due to specialized properties .
- **Size and Load Capacity:** Wider trays or those designed to carry heavier cables cost more. Standard widths range from 50 mm to 600 mm, with lengths typically 2-3 meters per section .
- **Splice Plates and Accessories:** Splice plates, used to connect tray sections, add to the total cost. A single splice plate can range from \$5 to \$25 depending on material and size .

### Typical Price Ranges

- Small sections (light-duty, 50-100 mm width): \$20-\$50 per tray section
- Medium sections (100-300 mm width): \$50-\$100 per tray section
- Large sections (300-600 mm width, heavy-duty): \$100-\$150 per tray section
- Splice plates: \$5-\$25 each, depending on material and size
