

Price of Plastic Steel Anti-corrosion Cable Trays

Article Overview

Plastic or polymer-based anti-corrosion cable trays typically range from \$20 to \$150 per meter, depending on material, size, and load capacity.

Material and Cost Factors

Polymer cable trays are made from high-tech resins such as PVC, ABS, or composite blends, offering excellent corrosion resistance, lightweight construction, and fire resistance. These trays are generally more expensive upfront than fiberglass trays but require less maintenance and have a longer service life, which can reduce total cost over time .

Fiberglass-reinforced plastic (FRP) trays are made from plastic reinforced with glass fibers and fire-retardant additives. They are strong, lightweight, and corrosion-resistant, often priced slightly lower than polymer trays while still providing long-term durability .

PVC cable trays are widely used in industrial and commercial applications for their lightweight, corrosion-resistant, and fire-retardant properties. Prices for perforated PVC trays typically start around \$20-\$50 per meter for standard sizes, with larger or heavy-duty trays costing more .
