

Price of Standard Fiber Optic Connectors

LoRa handheld portable base station

Article Overview

Common fiber optic connectors typically range from \$1 to \$15 per unit, depending on type, polish, and quantity.

Typical Price Ranges by Connector Type

- SC (Subscriber Connector): Widely used in FTTH and data centers, SC connectors generally cost \$1-\$5 per unit for standard UPC versions, while APC versions may range \$3-\$8 due to higher precision and lower return loss requirements .
- LC (Lucent Connector): Popular in high-density data centers, LC connectors are slightly more expensive due to their miniaturized design. Prices typically range \$2-\$6 per unit for UPC and \$4-\$10 for APC .
- ST (Straight Tip): Older bayonet-style connectors used in legacy or industrial networks cost around \$1-\$4 per unit, making them economical for maintenance of existing systems .
- FC (Ferrule Connector): Threaded connectors for high-vibration environments are more specialized, with prices ranging \$3-\$12 per unit, depending on polish type and manufacturer .
- MPO/MTP (Multi-Fiber Push-On/Pull-Off): Multi-fiber connectors used in high-density applications like data centers are more expensive, typically \$10-\$15 per unit, reflecting their complexity and multi-fiber alignment requirements .

Factors Affecting Prices

- Polish Type: UPC (Ultra Physical Contact) connectors are generally cheaper than APC (Angled Physical Contact) connectors due to lower manufacturing precision requirements
