

Price of high-precision invisible patch cords for Botswana backbone network

Article Overview

High-precision single-mode fiber patch cords in Botswana are available at approximately BWP 1,500–2,500 per 3-meter unit, depending on specifications and bulk orders.

Pricing Overview

High-precision fiber optic patch cords, particularly single-mode OS2 types with LC or SC connectors, are essential for backbone networks due to their low insertion loss and high return loss, ensuring minimal signal degradation over long distances . In Botswana, a 5-pack of 3-meter OS2 LC-SC patch cords is available online, providing a practical reference for pricing and procurement . Prices for such cords typically range from BWP 1,500 to 2,500 per 3-meter cord, with variations depending on connector polish (UPC or APC), jacket type (LSZH or armored), and vendor discounts for bulk purchases .

Key Specifications

- Fiber Type: Single-mode (OS2) for long-distance backbone links; multimode (OM3/OM4/OM5) for short-reach high-bandwidth connections .
- Connector Types: LC, SC, or MPO/MTP for multi-core applications; high-precision polishing ensures low signal reflection .
- Length: Standard lengths range from 1 to 10 meters; 3 meters is common for rack-to-rack connections
