

Price of outdoor shielding for optical cables

Article Overview

Outdoor fiber optic cables with shielding typically cost between \$0.25 and \$1.50 per foot for the cable alone, with installation adding \$2.00–\$6.00 per foot depending on complexity.

Pricing Overview

The cost of outdoor fiber optic cables depends on several factors, including fiber type (single-mode vs multimode), shielding type, jacket material, and installation environment. Single-mode fiber generally costs more per foot than multimode due to its longer transmission range and lower signal loss. Shielded cables, such as armored or steel-tape reinforced cables, provide additional protection against mechanical stress, rodents, and environmental hazards, which can slightly increase the price. For example, shielded steel fiber optic cables for outdoor use, like the Elfcam 50m LC/UPC OS2 Duplex, are sold in lengths of 50 meters and include steel tape shielding and LSZH jackets, offering durability against pressure, UV exposure, and rodent damage. Prices for such cables vary by length and vendor, but the per-foot cost aligns with the \$0.25–\$1.50 range for the cable itself, excluding installation.

Types of Outdoor Shielding

- **Foil Shielding:** Thin metal foil wrapped around fibers to protect against electromagnetic interference (EMI) and minor mechanical stress.
- **Wire Mesh or Steel Tape Shielding:** Combines metal mesh or steel tape with foil fo...
