

Pricing for Fiber Optic Cable Assembly

Article Overview

Fiber optic cable assemblies typically range from \$0.09 to \$6 per foot for materials, with pre-terminated assemblies costing more depending on fiber count and connector type.

Material Costs

The cost of fiber optic cables varies widely based on fiber type, strand count, and construction. Single-mode fiber generally costs \$0.10 to \$0.50 per foot, while multimode fiber ranges from \$0.30 to \$1.00 per foot. Higher strand counts increase costs proportionally; for example, a 12-strand cable may cost around \$0.50 per foot, whereas a 24-strand cable can reach \$1.00 per foot. Armored or direct-burial cables designed for harsh environments can cost \$0.50 to \$5 per foot. Indoor riser-rated cables are less expensive than plenum-rated cables for air-handling spaces, and glass fiber cores are more costly than plastic alternatives due to superior performance .

Pre-Terminated Assemblies

Pre-terminated or factory-polished fiber assemblies, including patch cables, incur higher costs because of connectorization and testing. Prices depend on the number of fibers and connector type. For example, a simple 1-core FTTH drop cable may cost \$0.13 per foot, while a 288-count backbone cable can reach \$6 per foot or more. Pre-terminated assemblies reduce field labor by up to 70%, which can offset the higher upfront material cost .
