

Regulations for the Use of Smart Distribution Boxes in Albania

Article Overview

Smart distribution boxes in Albania are regulated under the 2026 Electricity Law, the Distribution Code, and related smart metering frameworks, ensuring compliance with technical, operational, and EU-aligned standards.

Legal and Regulatory Framework

The 2026 Electricity Law establishes the legal basis for smart metering and smart distribution technologies in Albania. It promotes a competitive, secure, and low-carbon electricity market while formalizing the use of smart meters and dynamic pricing systems. The law empowers the Energy Regulatory Authority (ERE) as the independent regulator responsible for overseeing electricity distribution, including the deployment and operation of smart distribution boxes. It also aligns Albania with EU directives on prosumers, energy communities, and grid flexibility, providing a legal foundation for active customer participation and smart grid integration .

Technical and Operational Requirements

The Distribution Code sets out detailed technical and procedural rules for distribution system operators (DSOs) and users. It specifies:

- Connection criteria for customers, including installation of smart distribution boxes and meters .
- Operational standards for DSOs to ensure reliable, stable, and economic operatio...
