

# Samoa Fireproof Cable Tray Specifications Table

## Article Overview

Samoa fireproof cable trays are primarily made from fiberglass-reinforced plastic (FRP), offering high fire resistance, durability, and suitability for harsh industrial environments.

### Material and Fire Resistance

Samoa fireproof cable trays are typically constructed from pultruded fiberglass-reinforced plastic (FRP), which provides excellent fire retardant properties and complies with standards such as ASTM E84 and BS 476 . FRP trays are non-corrosive, non-magnetic, and UV-resistant, making them ideal for onshore and offshore facilities, petrochemical plants, and other industrial applications . The material ensures no rusting, peeling, or flaking, even under aggressive environmental conditions.

### Models and Series

Samoa offers a range of cable tray models, including:

- LH Series: Side rail thickness of 6 mm, designed for heavy-duty applications .
- LMH Series: Side rail thickness of 4.5 mm, suitable for medium loads .
- LM Series: Side rail thickness of 4.5 mm, optimized for lighter loads . These trays are available in trough, ladder, and perforated designs, allowing flexibility for different cable routing and ventilation requirements ....
