

Selected Fiber Optic Coupler Accessories

Article Overview

Fiber optic coupler accessories include adapters, couplers, attenuators, cleaning tools, and cable management components to ensure reliable optical signal transmission and network performance.

Fiber Optic Couplers and Adapters

Fiber optic couplers, also called adapters, are used to connect two fiber optic cables or extend existing cables. They come in simplex (single fiber), duplex (two fibers), or quad (four fibers) configurations and are available for singlemode or multimode fibers. Common connector types include LC, SC, ST, FC, and MPO/MTP, with hybrid adapters allowing connections between different types (e.g., LC to SC) without signal loss. Couplers can be used in patch panels, wall plates, or standalone setups to maintain signal integrity.

Attenuators

Fiber optic attenuators are used to reduce optical power to prevent over-saturating receivers. They are available in fixed values (e.g., 5dB, 10dB, 15dB, 20dB) and support LC/APC, LC/UPC, SC/APC, SC/UPC, and ST/UPC connectors. Attenuators help maintain low bit error rates and protect sensitive equipment in high-power optical networks.
