

South Sudan Low-Voltage Distribution Box Supply

Article Overview

Low-voltage distribution boxes in South Sudan are available through both local distributors like JEDCO and international manufacturers such as GEYA, TP Electric, and EKT Enerji, offering certified, high-quality products.

Local Supply and Distribution

The Juba Electricity Distribution Company Ltd. (JEDCO) is the primary electricity distributor in South Sudan, particularly in Juba. While JEDCO mainly manages electricity distribution and meter services, it also facilitates connections and upgrades for residential and commercial customers, ensuring safe and reliable low-voltage supply infrastructure. They provide professional support for installation, load adjustments, and maintenance, which is essential for integrating distribution boxes into the local grid.

International Manufacturers and Suppliers

Several international companies supply low-voltage distribution boxes suitable for South Sudan projects:

- GEYA: Offers distribution boxes, miniature circuit breakers, DC surge protectors, and smart electricity meters. Their products are certified by UL, CSA, TUV, and CE, ensuring compliance with international safety standards. GEYA provides in-house testing and customization to meet specific project requirements
