

What are the dimensions of the PZ30 distribution box

Article Overview

The PZ30 Distribution Box is a 9mm modular low-voltage distribution box suitable for single-phase or three-phase circuits.

Modular Size and Configuration

The PZ30 is designed as a 9mm modular distribution box, meaning each module occupies 9mm of width on the DIN rail, allowing flexible configuration depending on the number of circuits required . It supports single-phase three-wire or three-phase five-wire circuits with rated voltages up to 500V and load currents up to 100A .

Material and Construction

The box is made from high-quality steel plates (typically 1.0mm thick) with high-voltage electrostatic powder coating for corrosion resistance and durability . The face cover is often transparent plastic, and the shell includes knock-out holes for convenient cable entry . External fasteners are stainless steel, and sealing components are silicone rubber, providing resistance to oil, acids, alkalis, high temperatures, and aging .

Installation Types

PZ30 boxes are available in exposed (surface-mounted) and concealed (flush-mounted) installation types . Multiple entry orientations are provided to accommod...
