

What is the unit price for laying cables in a cable tray

Article Overview

The unit price for laying cables in a cable tray typically ranges from \$10 to \$50 per meter, depending on material, tray type, and installation complexity.

Material Costs

The cost of the cable tray itself varies by material and design:

- Steel trays: \$5–\$30 per meter, widely used for general-purpose installations due to strength and affordability .
- Aluminum trays: \$6–\$50 per meter, lightweight and corrosion-resistant, ideal for outdoor or industrial environments .
- FRP (Fiberglass Reinforced Plastic) trays: \$10–\$50 per meter, suitable for aggressive environments where corrosion resistance is critical .
- Stainless steel trays: Highest durability and corrosion resistance, used in hygienic or harsh environments, generally more expensive than aluminum . Tray type also affects cost: ladder trays are more expensive but support heavier cables, while perforated or wire mesh trays are cheaper and suitable for lighter loads .

Installation and Labor Costs

Laying cables in a tray involves more than just the tray price. Labor and installation costs depend on:...
