

Where does the reserved hole size for the distribution box refer to

Overview

When building the wall, the reserved hole should be about 20 mm larger than the length and width of the distribution box, and the reserved depth is the thickness of the distribution box plus the plastering thickness of the inner wall of the hole. When the distribution box is installed on the wall, it should be fixed with split bolt (expansion bolt). IP is a global standard, whose first. Learn 100+ words with the prefix pre like preach, preacher, preamble, precede and more with. The invention discloses a construction method of a reserved line hole of a distribution box slot, which comprises the following steps: s1, placing the prefabricated part at a preset position when building a wall; s2, building a brick body along the periphery of the prefabricated member to support. The distribution box shall be embedded in the wall.
